

Open Post Doc position: Interactions at surfaces and interfaces

The Department for Materials Synthesis (<http://www.ferrites.si/>) at Jožef Stefan Institute in Ljubljana, Slovenia is looking for a post-doc researcher with PhD degree in Chemistry or Materials Science. Experience in one or more of the following field is required: nanomaterials synthesis and surface functionalization, organic chemistry, colloidal chemistry and processing.

We offer a full-time contract for one year with a possibility for additional two years. The earliest possible starting date is 1. 11. 2022 or as soon as possible. The position at Jožef Stefan Institute includes a full-time salary and full employment benefits, social security and health insurance.

The candidate will have an opportunity to work with an excellent interdisciplinary (materials science, chemistry, physics, modelling, electrical engineering) team within our research core program and selected project. The Jožef Stefan Institute will offer all the necessary basic knowledge, support and infrastructure for the candidate, as well as interaction with our research partners.
